

Yassine TENZEKHTI

Seeking a 5-month Cybersecurity Internship in SOC / AppSec / GRC

November 2026 to March 2027 · Ile-de-France · Driving licence B

06 25 32 01 65 · ytenzekhti@gmail.com · github.com/YassTen · portefolioy.netlify.app

TECHNICAL SKILLS

OS: Windows, Linux (Kali, Ubuntu, Debian), Bash, PowerShell

Networks & Protocols: OSI, TCP/IP, UDP, DHCP, DNS, HTTP/HTTPS, IPv4/IPv6, VLAN, ARP, SSH, NAT, Firewall

Virtualisation & Cloud: VMware, VirtualBox, AWS (IAM), Azure

Cybersecurity & Offensive: Penetration testing, MITM, ARP/DNS Spoofing, OWASP (SQLi, XSS, Command Injection)

Cryptography: RSA, symmetric/asymmetric encryption, hashing (MD5/SHA), PKI, OpenSSL, TLS/SSL

Programming: Python, C/C#, Java, HTML, CSS, JavaScript, VHDL, Matlab, Node.js

Databases: MySQL, SQLite

Cisco Certification: Cybersecurity Essentials

Version Control: Git, GitHub

EDUCATION

EFREI Paris, Computer Science Engineering (L3 / 1st year), Paris, France · 2023 to present

- Focus: Distributed systems, AI, Networks and System Security.
- Modules: Cisco Packet Tracer, Wireshark, Linux Administration.

Lycee JJR, Scientific Baccalaureate, France · 2021 to 2023

PROJECTS

SIEM & XDR Platform Deployment, Wazuh on OVH VPS, Academic Team Project, EFREI 2026

- **Infrastructure:** Deployed Wazuh (all-in-one then multi-node via Docker) on an OVH VPS (8 vCore / 24 GB RAM / 200 GB NVMe, Ubuntu 24.04 LTS).
- **Monitoring:** Integrated heterogeneous endpoints (Windows, Linux, web server, firewall, network switch) via agents and syslog.
- **Detection:** Configured custom correlation rules for brute-force, file integrity monitoring and suspicious process detection.
- **Compliance:** Architecture aligned with GDPR requirements and ISO/IEC 27001 security best practices.

Audit & Development of an ATS (Application Tracking System), Company Project

- **AppSec:** Designed a secure architecture preventing OWASP Top 10 vulnerabilities (SQL Injection, XSS).
- **Auth:** Implemented BCrypt hashing (10 rounds), JWT sessions and RBAC system.
- **Data security:** Strict input validation via Zod and file upload hardening (MIME Whitelist).

Home Lab: Network Audit & System Hardening, Personal Project

- **Isolation:** Configured an isolated LAN segment under VMware for secure analysis.
- **Audit:** Network reconnaissance with Nmap and real-time traffic analysis using Wireshark.
- **Defence:** System hardening by filtering critical ports (SMB/RPC).

SSL/TLS Vulnerability Scanner, Personal Project

- **Automation:** Python script for automated HTTPS configuration auditing.
- **Detection:** Identification of deprecated protocols (TLS 1.0/1.1) and weak cipher suites.
- **Reporting:** Generation of compliance reports based on security best practices.

PROFESSIONAL EXPERIENCE

Youth Mentor at Camplus, Jul. 2024 to Sep. 2024

- Guided young people on professional workplace practices and codes of conduct.
- Planned and monitored marketing operations and communication strategy.
- Created and managed social media content to promote the organisation.

Electronics Customer Advisor at Boulanger, Jan. 2022 to Mar. 2023

- First-level technical diagnostics and in-depth product knowledge.
- Strict application of safety and security procedures.
- Stock organisation and just-in-time inventory management.

LANGUAGES & INTERESTS

Languages: French (Native), English (C2, fluent), Arabic (fluent), German (B2)

Soft Skills: Organisation, Autonomy, Teamwork, Curiosity, Communication

Interests: Sport (Swimming 10 yrs, Judo 5 yrs), Video games, Drawing, Music
