PROFESSIONAL EXPERIENCE

ATS (Application Tracking System) audit and development, Freelance, under contract Feb 2023 to Jun 2023
- **Application security:** Node.js application with a relational database handling sensitive data, BCrypt authentication, JWT sessions, RBAC and OWASP Top 10 prevention.

Youth Mentor at Camplus Jul 2024 to Sep 2024
- Guided young people on working in a company and professional codes.

Electronics Customer Service Agent at Boulanger Jan 2022 to Mar 2023
- First-level technical diagnosis and in-depth product knowledge.

PROJECTS

Offense

Ethical Hacking, Academic team project EFREI 2026
- **Lab pentesting:** Full 5-phase chain on virtualized Windows machines, OSINT, scanning and enumeration, monitoring dashboard.

Malware analysis, Academic team project EFREI 2026
- **Analysis:** Three malware samples in a sandbox with MITRE ATT&CK mapping, booby-trapped PDF and EXIF image analyzed statically, YARA rules. I built the isolated lab and carried out the PDF and image analysis.

Defense

SIEM and XDR platform deployment, Wazuh on OVH VPS, Academic team project EFREI 2026
- **Infrastructure:** Multi-node Wazuh with Docker on an OVH VPS, OpenSearch cluster and Nginx load balancing.
- **Security:** File integrity monitoring, XML detection rules, access hardened with UFW, VirusTotal API in Python.

Patch management in PowerShell, Academic pair project EFREI 2026
- **Compliance:** Chain of 7 scripts remotely checking patches on a Windows fleet, compliant or non-compliant classification, HTML report and email alert.
- **Hardening:** WinRM restricted by firewall, restricted NTFS rights, encrypted password, least privilege. 27-page report and demo video.

SSL/TLS vulnerability scanner Personal project
- **Automated checks:** Python script checking HTTPS configurations and generating compliance reports.

Infrastructure

Virtualization and storage, Five lab sessions in pairs EFREI 2026
- **Infrastructure:** ESXi and vSphere with datastores, snapshots and migrations, Docker Compose, NAS over NFS and SAN over iSCSI with CHAP authentication.

Home Lab: Network audit and system hardening Personal project
- **Hardening:** Isolated LAN under VMware, exposed ports and services identified, critical SMB and RPC ports filtered.

EDUCATION

EFREI Paris, Engineering Program, 4th year, Paris, France 2023 to present
- **Specialization:** Cybersecurity, infrastructure, software, networks and cloud.
- **Modules:** Cisco Packet Tracer, Wireshark, Linux Administration, Virtualization (ESXi, Docker).

French Scientific Baccalauréat, Très Bien (highest honours), France 2021 to 2023

TECHNICAL SKILLS

Security and compliance: Wazuh (SIEM/XDR), XML detection rules, file integrity, log analysis, system hardening, UFW, patch compliance checks, least privilege, RBAC, NTFS, AWS (IAM), OWASP Top 10

Threat analysis: Malware analysis (static and sandbox), MITRE ATT&CK, IoC, YARA, OSINT, Kali Linux, Nmap, Wireshark

Cryptography: RSA, symmetric and asymmetric encryption, hashing (MD5, SHA), PKI, OpenSSL, TLS/SSL

Systems, networks and virtualization: Windows, Linux (Kali, Ubuntu, Debian), WinRM, TCP/IP, DNS, VLAN, NAT, VPN, Cisco Packet Tracer, VMware ESXi and vSphere, Docker, Docker Compose, Portainer, NFS, iSCSI, OVH VPS

Development and databases: Python, C/C#, Java, HTML, CSS, JavaScript, Node.js, VHDL, Matlab, Bash, PowerShell, MySQL, SQLite, Git, GitHub, technical reports and documentation

CERTIFICATIONS

CompTIA Security+: In preparation (planned 2026)

Cisco Cybersecurity Essentials: Obtained

LANGUAGES AND OTHER

Languages: French (Native), English (C1, fluent), Arabic (fluent), German (B2)

Soft skills: Organization, Autonomy, Teamwork, Rigor, Communication

Interests: Sport (Swimming 10 years, Judo 5 years), Video games, Drawing, Music
